Who is Stephens Instruments?

Established in 1976, Stephens Instruments has grown to become an industry-leading ophthalmic surgical instrument provider. A family-owned and operated company based in Lexington, Kentucky, USA, Stephens Instruments provides its full portfolio of **over 1000 products** to a global network of distributors in more than 50 countries around the world.

Stephens Instruments was founded on the philosophy of providing the highest quality products and unmatched customer service in the industry – all backed by an innovative design team keeping Stephens at the forefront of new surgical techniques introduced **over the past 45 years**.

Why choose Stephens?

Stephens Instruments' commitment to excellence in products and services is maintained with our certificate to ISO 13485, CE Marking, and FDA registration. Our emphasis on precision and value transfer directly to your practice with surgical instruments that will last for years to come. See why practitioners around the world have chosen Stephens Instruments and established relationships that were crafted to last a lifetime.

Lifetime Warranty

Stephens Instruments products are fully warrantied to the original owner against defects in materials and workmanship for the lifetime of the product. Any instrument with such a defect may be repaired or replaced free of charge. All unused Stephens Instruments products may be evaluated and returned for any reason during the first 30 days.

How to Order

Our team simplifies the ordering process and is here to work with you through any questions. Orders may be placed online or by contacting us through a method below:

VeraPlug™ *flow*

Punctal Occlusion System

The **VeraPlug™ Flow** is designed to provide a simple and effective means of slowing tear drainage.

- Inner channel reduces but does not eliminate tear flow, providing only **partial occlusion**
- Engineered to perfectly fit the puncta for **excellent retention**
- Low-profile dome for **enhanced patient comfort**
- Proprietary shaft design for **easy insertion** and **proper anatomic fit**

VeraPlug Flow Sterile Preloaded

Individually packaged and preloaded on a sterile, disposable inserter. 1 pair per box.

Vera180™

Synthetic absorbable lacrimal plugs provide approximately **6 months of treatment.**

Months
OF RELIEF FROM DRY EYE

- Provides extended temporary occlusion lasting approximately **180 days**
- Ideal for treatment of **post-surgical dry eye**, and to determine potential effectiveness of a non-absorbable punctal plug
- Also indicated for use in treating the dry eye components of various **ocular surface diseases**, including contact lens intolerance

Vera180 Synthetic Absorbable Lacrimal Plugs

Synthetic absorbable lacrimal plugs made of poly-p-dioxanone (PDO). Absorbs in approximately 180 days.

Temporary Punctal Occlusion

VeraC7™

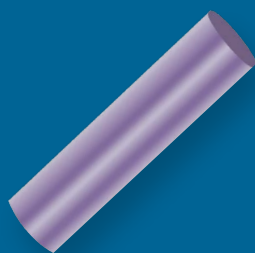

Temporary Collagen Inserts lasting **7 to 10 days**

- Ideal for **diagnostic use** in chronic dry eye patients considering permanent punctal occlusion
- Also indicated for extending medication contact time and effectiveness

VeraC7 Collagen Inserts

Collagen punctal inserts for diagnostic use, providing highly effective occlusion in the first 2 to 3 days post-insertion. Absorbs completely in 7 to 10 days. 60 inserts per box (10 packs of 6 inserts each).

Dry Eye Diagnostics

BioGlo™

Fluorescein ophthalmic strips for evaluating contact lens fittings, corneal and conjunctival problems and applanation tonometry. CE marked. 100 or 300 individually wrapped sterile strips per box.

Lissamine Green

Ophthalmic test strips for evaluating corneal and conjunctival problems. Unlike Rose Bengal, it is sting-free. 100 individually wrapped sterile strips per box.

TearFlo™

Schirmer-type tear test for measuring and recording tear volume. CE marked. 100 individually wrapped sterile strips per box.

Miscellaneous

Dry Eye Compress

LAC-1000

Featuring HydroHeat™ technology to provide clean, deep-penetrating, moist heat. Microwave for 30 seconds and apply 3-5 minutes a day to relieve dry eye and improve meibomian gland function, or freeze and apply cold to relieve swollen, puffy eyes.

OptiGraft™

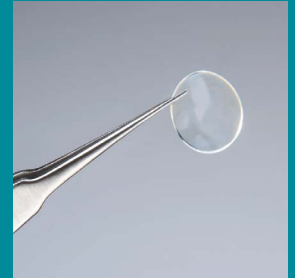

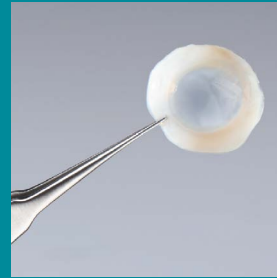

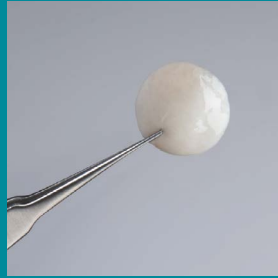

Sterile Ophthalmic Allografts

The Premium Choice for Glaucoma and Corneal Applications.

Hydrated, irradiated, sterile tissue has long been the gold standard for ocular patch graft options—its low risk of postsurgical infection or immune rejection and long shelf life are obvious advantages. High operational costs and reimbursement concerns have hampered widespread use until now.

OptiGraft™ sterile ophthalmic allografts offer high-quality, shelf-stable, terminally-sterilized tissue as an affordable option for glaucoma and corneal procedures. In addition to these benefits, the longer shelf life of up to 2 years, ambient storage capability, and specially designed packaging for ease of use make the OptiGraft line a practical option for healthcare providers worldwide.

Sterile Patch Grafts for Glaucoma Surgery

- Tube shunt and valve coverage
- Trabeculectomy support
- Structural integrity restoration
- Bleb, scleral buckle repair, and corneoscleral fistul repair

Sterile Cornea for Corneal Surgery

- Corneal Perforation
- Corneoscleral laceration repair
- Trauma and/or Emergency
- Boston keratoprosthesis (KPro)
- Tectonic anterior lamellar keratoplasty (ALK/ DALK)
